Motivation is the reason for people's actions, willingness and goals. Motivation is derived from the word motive in the English language which is defined as a need that requires satisfaction. Machine learning (ML) is the scientific study of algorithms and statistical models that computer systems use to effectively perform a specific task without using explicit instructions, relying on patterns and inference instead. Thanks a lot to @aerinykim, @suzatweet and @hardmaru for the useful feedback! The academic Deep Learning research community has largely stayed away from the financial markets. As per this thread and this tweet, Open AI Five was trained on something like 45,000 years of gameplay experience, and it took less than one day for humans to figure out strategies to consistently beat it., Co Evolutionary And Reinforcement Learning Techniques In Computer Go Some Techniques Of Machine Learning Applied To Computer Go.
