In mathematics, a partial differential equation (PDE) is a differential equation that contains unknown multivariable functions and their partial derivatives.Minisymposium: Mixed Finite Element and Hybridized Discontinuous Galerkin Methods, WONAPDE 2013: Fourth Chilean Workshop on Numerical Analysis of Partial Differential Equations, January 14 - 18, 2013, University of Concepcion, Concepcion, ChileNumerical analysis is the study of algorithms that use numerical approximation (as opposed to symbolic manipulations) for the problems of mathematical analysis (as distinguished from discrete mathematics).This mini-symposium aims to provide a forum for specialists in reactive gas mixtures modeling and simulation, to identify and discuss, express and publish their expert views on current research, challenges in, and possible solutions for modeling of non-equilibrium processes, as well as developing the novel analytical and numerical methods for ..., Domain Decomposition Methods For Partial Differential Equations Numerical Mathematics And.
