

Download Ecm - Enterprise Content Management

Enterprise content management (ECM) extends the concept of content management by adding a time line for each content item and possibly enforcing processes for the creation, approval and distribution of them. OpenText™ Content Services is a key part of any company's information management strategy, connecting information from across the enterprise with the people and systems that need it. OnBase is recognized as a market leader in enterprise content management (ECM). OnBase manages your enterprise content from the point of inception all the way through the information lifecycle until final archival and destruction. Enterprise content management (ECM) is used to create, store, distribute, discover, archive and manage unstructured content (such as scanned documents, email, reports, medical images and office documents), and ultimately analyze usage to enable organizations to deliver relevant content to users where and when they need it., Ecm - Enterprise Content Management.
