

Download Food Factors For Cancer Prevention

Chemoprevention is currently regarded as one of the most promising avenues for the control of cancer, with human epidemiological and animal studies indicating that the risk of cancer may be modified by changes in diet. While there's no magic food or diet guaranteed to cure or prevent cancer, lifestyle factors—including your diet—can make a big difference in lowering your risk of developing the disease. And if you are currently battling cancer, adopting the right diet now can help maintain your strength and health. Information about certain foods, minerals, and other parts of a person's diet and their associations with reducing or increasing the risk of cancer.
