Chromatography is a laboratory technique for the separation of a mixture. The mixture is dissolved in a fluid called the mobile phase, which carries it through a structure holding another material called the stationary phase. Also see: High-Performance Liquid Chromatography; Ion Chromatography; Thin-layer Chromatography; Gas chromatography (GC) is an instrumental technique used forensically in drug analysis, arson, toxicology, and the analyses of other organic compounds. The Handbook of Receptor Classification and Signal Transduction is a reference for scientists, researchers, educators, and the like. It contains over 100 entries covering such topics as Intracellular Signaling Enzymes and Receptors, signal transduction, Ion Channels, Non-Peptide Receptors, Synthesis and Metabolism, Peptide Receptors and Peptide ...by: Don W. Green, Robert H. Perry Abstract: The definitive reference for more than half a century,—updated for the first time in more than a decade., Handbook Of Process Chromatography.
