Acclaim for Life by the Numbers "Not in many, many years have I seen a book as instructive and enlightening about the beauty of mathematics. Life by the Numbers is truly superb. Life by the Numbers has a simple thesis to prove: that math is anywhere and everywhere; but instead of asserting the pervading ubiquity of mathematics whether you like it or not, the book convinces you that you *will* like it, period. Keith Devlin brought math alive as he wrote about many ways of using mathematics to improve everything in your life. For example he explained simp Reviewed by: Erik F Life by the Numbers is an exciting book about how math plays a massive role in our lives. Life by the Numbers is the overall title for a series of TV programs on mathematics produced by WQED Pittsburgh with support from a number of foundations and corporations. The first program in the series was shown on PBS on April 8., Life By The Numbers.
