

Download Natural Language Question Answering System And Method

Natural-language programming (NLP) is an ontology-assisted way of programming in terms of natural-language sentences, e.g. English. A structured document with Content, sections and subsections for explanations of sentences forms a NLP document, which is actually a computer program. Javier Couto. PhD in Natural Language Processing from Paris-Sorbonne University. Solid experience in international research projects, both in the industry and in the academia, holding posts as Research Engineer, Consultant, R&D Team Manager and Lecturer. Chapter 1 Introduction. Natural language processing (NLP) is a theory-motivated range of computational techniques for the automatic analysis and representation of human language. 1 Computing with Language: Texts and Words. We're all very familiar with text, since we read and write it every day. Here we will treat text as raw data for the programs we write, programs that manipulate and analyze it in a variety of interesting ways., Natural Language Question Answering System And Method.
