Freshwater ecosystems are a subset of Earth's aquatic ecosystems. They include lakes and ponds, rivers, streams, springs, bogs, and wetlands. They can be contrasted with marine ecosystems, which have a larger salt content. There is/was a problem with your internet connection. Please note that some features may not function properly. Please refresh your browser if your internet ... The zebra mussel (*Dreissena polymorpha*) is a small freshwater mussel. This species was originally native to the lakes of southern Russia and Ukraine. However, the zebra mussel has been accidentally introduced to numerous other areas, and has become an invasive species in many countries worldwide. Conservation - Calculating background extinction rates: To discern the effect of modern human activity on the loss of species requires determining how fast species disappeared in the absence of that activity. Studies of marine fossils show that species last about 1–10 million years. Assume that all these extinctions happened independently and ..., North American Freshwater Mussels Natural History Ecology And Conservation.
