Henry, 'the tower doctor', is a recognised specialist with a vast background in all phases of distillation, including operation, troubleshooting, design, start-up, and research.1 Practical Distillation Technology With Henry Kister August 4-6, 2014 Brought to you by the South African Institution of Chemical Engineers KwaZulu-Natal Branch Distillation is the process of separating the components or substances from a liquid mixture by using selective boiling and condensation. Distillation may result in essentially complete separation (nearly pure components), or it may be a partial separation that increases the concentration of selected components in the mixture.
